

# TRYON TRADING

NEWSLETTER 160

SEP 2009

## WELCOME

WE WOULD LIKE TO WELCOME THE MANY NEW FIRMS THAT ARE VIEWING THIS NEWSLETTER FOR THE FIRST TIME.

WE ARE GLAD TO SERVE YOU AND WELCOME YOUR CONTINUED USE OF OUR QUOTATION SERVICES.

## NEW FINAL EMAIL ADDRESS

[Bud@tryontrading.com](mailto:Bud@tryontrading.com)

The above address is now tied to our web server and not our phone company. So, it will not change should the phone company be sold.

Please make our FAX number your second choice to reach us. That number is 877-398-8134 (from USA) and 848-787-5149 (from Overseas)

[tryonusa@windstream.net](mailto:tryonusa@windstream.net) will be kept as an alternate email. Since the change to windstream on 5/15/09 we have discovered that many incoming emails were not received (including orders), and many outgoing emails were not delivered. If you have emails we have not responded to, please resend them to our NEW email address above.

We regret any inconvenience caused by the windstream problem.

## NEW PRODUCTS GREAT OPPORTUNITY

Liquid Controls Sponsler has expanded our product range to include the following Liquid Controls products:

MAG Meters  
Coriolis MASS Meters  
POSITIVE DISPLACEMENT Meters

We may promote and sell these additional products to all Industrial Markets. We are not authorized to sell to the REFINED FUEL market. [ Sponsler Turbine meters are available for all markets ]

We have excellent pricing and can make you complete for these products for your customer needs.

Please review these NEW products at the Liquid Controls web site:  
[www.lcmeter.com](http://www.lcmeter.com)

Tryon Trading has been the export sales arm for Sponsler for over 22 years. We have many loyal Reps and Customers that have been working this line with us for 15 years or more. This is a great opportunity to quote and sell for the many additional applications that these meters can handle.

We look forward to your requests for quotations on these added flowmeter products.

Tryon Trading is in its 23rd year of serving International Customers for process products including flowmeters, valves, instruments, and motors which are our specialty
